

IMDEX SURVEY-IQ™

One app to rule them all

Control multiple survey tools such as the REFLEX EZ-GAMMA™, REFLEX GYRO SPRINT-IQ™ and REFLEX EZ-GYRO™ through one app.

Less wires, less chargers, less equipment

Using one tablet and interface with multiple tools at the same time reduces hardware costs (including tablets, and chargers) while increasing functionality. You can now monitor everything from the one app.

Multi tool, multi stream, real-time information

IMDEX SURVEY-IQ™ allows efficient and simultaneous quality assured survey and gamma logging that can be completed by one member of the drill crew. Survey results are immediately available for approval via the cloud-based service IMDEXHUB-IQ™. As well as further analysis in ioGAS™ or 3D visualisation software such as Seequent Central.

Boost productivity

IMDEX SURVEY-IQ™ has crossed the threshold in saving hours for drilling operations by increasing productivity up to four times compared to using conventional apps.

Time stamped drillers run sheet

With paperless run sheets, the driller or supervisor has the ability to work out how many meters per shift, when the drilling happened, and even if there were stops or delays.

KEY BENEFITS

UP TO **4x**

INCREASE IN PRODUCTIVITY*

Integrated with

Multi tool, multi stream, real-time information

Benefits

INSTANT DECISION
MAKING WITH
ACCURATE REAL-TIME
DATA

CONFIDENCE IN THE
QUALITY OF YOUR
DATA THROUGH IN
BUILT QA/QC

NO ON-SITE
TECHNICIAN
REQUIRED WITH EASY
TO USE DRILLER-
OPERABLE TOOLS

REDUCED
COMPLEXITY AND
COST OF EQUIPMENT

REAL-TIME SUBSURFACE SOLUTIONS
