

REFLEX ORI-BLOCK™

Questionable orientations?
Now you can confirm them yourself.

Orientated Core Block

It is now possible to audit core orientations on or off-site, and even years later, by referring to the REFLEX ORI-BLOCK™ left residing in the core tray. It retains the bottom of hole profile of the undrilled core, while it was part of the undisturbed parent rock.

Designed exclusively for use with the REFLEX EZ-MARK™ and REFLEX VERTI-ORI™ Core Orientation Systems, the REFLEX ORI-BLOCK™ replaces the traditional orientation heads.

The low cost of the REFLEX ORI-BLOCK™ makes it an invaluable part of your drilling inventory. On-site training by a fully qualified technician is available for all newly commissioned REFLEX tools.

Further Information

For more information please go to our website www.reflexnow.com or contact your nearest REFLEX office.

Marking the orientation line.

REFLEX ORI-BLOCK™ used as core marker block.

Additional Benefits

- Fully auditable and verifiable core orientations
- Record hole depth, inclination, deviation, loss/gain
- Replaces traditional core tray marker blocks
- UV and weather resistant
- Quick and simple to use.

REFLEX ORI-BLOCK™ available in boxes of 100.
